

# Syllabus & Course plan

**Course Name:** Python Basics to Advanced

**Duration** : Weekend (10 weeks) / Weekday (5 weeks)

**Medium** : Classroom

**Highlights** : 200+ Practice questions, 5 mini-projects

**Training Kit** : All course related software, Notes, Class notes, Certificate

## Chapter 0: Demo class

0.1 Course overview

0.2 Demo topics as per audience

## I. Python Basics

### Chapter 1: Getting started with Python programming

1.1 Introduction to Python

1.1.1 Python features

1.1.2 Scope of python

1.1.3 Python products

1.1.4 Python in today's context

1.2 Python Download, Installation and Environment Setup

1.3 First python program execution "Hello World"

1.4 The world of programming

1.5 Python programming syntax

### Chapter 2: Variables, keywords and Operators

2.1 Variables

2.1.1 Memory mapping of variables

2.1.2 Application memory

2.1.3 Variable nomenclature

2.1.3 Properties and scope of variables

2.2 Keywords in Python

2.3 Operators

2.3.1 Arithmetic operators

2.3.2 Operator precedence

2.3.3 Logical operators

2.3.4 Membership Operators

2.4 Basics I/O and Type casting

2.5 `__builtins__` functions and getting help

### Chapter 3: Control flow statements

3.1 Flow of program control

3.2 Decision making statements: if-elif-else

3.3 for loop

3.3.1 Making of 'for' loop

3.3.2 Repetition using for loop: range() function

3.3.3 Iteration using for loop

- 3.4 while loop
  - 3.4.1 Making of 'for' loop
  - 3.4.2 Infinite loop
- 3.5 Loop control keywords: break, continue, pass

## **Chapter 4: Numbers and Functions**

- 4.1 Introduction to functions
  - 4.1.1 Function definition and return
  - 4.1.2 Function call and reuse
  - 4.1.3 Function parameters
- 4.2 Function recipe and docstring
- 4.3 Programming with functions
- 4.4 Namespaces and scope of variable
- 4.5 Numbers - int, float, long, complex

## **Chapter 5: Strings**

- 5.1 Introduction to Python 'string' data type
- 5.2 Properties of a string
- 5.3 String built-in functions
- 5.4 Programming with strings
- 5.5 String formatting

## **Chapter 6: Lists**

- 6.1 Introduction to Python 'string' data type
- 6.2 Properties of a list
- 6.3 List built-in functions
- 6.4 Programming with lists
- 6.5 List comprehension

## **Chapter 7: Tuples, Dictionary and Sets**

- 7.1 Tuples as Read only lists
- 7.2 Moving from list to dictionary
- 7.3 Dictionary built-in functions
- 7.4 Sets and sets properties
- 7.5 Set built-in functions

## **Chapter 8: Practice, Test & Revision**

# **II. Advanced Python**

## **Chapter 9: More of Python functions**

- 9.1 Recursive functions
- 9.2 \*args, \*\*kwargs, argv
- 9.3 Modules and Packages
- 9.4 Iterators and Generators
- 9.5 Function decorators

## **Chapter 10: Object oriented programming with Python**

- 10.1 OOPs concepts: Classes and objects
- 10.2 Making of a class and module namespace
- 10.3 Static and instance variables
- 10.4 Deep understanding of self and `__init__()`
- 10.5 Inheritance and Overriding

## **Chapter 11: Object oriented programming continued**

- 11.1 Overloading functions
- 11.2 Operator overloading
- 11.3 Encapsulation: Hiding attributes
- 11.4 Understanding threads
- 11.5 Multithreading

## **Chapter 12: Exception Handling in Python**

- 12.1 Understanding exceptions
- 12.2 try, except, else and finally
- 12.3 raising exceptions with: raise, assert
- 12.4 Creating your own exception classes
- 12.5 Logging and Debugging

## **Chapter 13: File handling - Part 1**

- 13.1 Working with files
- 13.2 File objects and Modes of file operations
- 13.2 Reading, writing and use of 'with' keyword
- 13.3 read(), readline(), readlines(), seek(), tell() methods
- 13.4 Handling comma separated value files
- 13.5 CSV reading and writing with DictWriter

## **Chapter 14: File Handling - Part 2**

- 14.1 Working with PDFs
- 14.2 JSON parsing
- 14.3 XML parsing with DOM and ElementTree
- 14.4 File compression - zipping and unzipping
- 14.5 Pickling

## **Chapter 15: Regular expression**

- 15.1 Pattern matching
- 15.2 Meta characters for making patterns
- 15.3 re flags
- 15.4 Project 1: Pattern matching over files
- 15.5 Project 2: Handling error log and plotting error graphs

## **Chapter 16: Database connectivity and Python webpages**

- 16.1 Working with MySQL database
- 16.2 Working with Sqlite3 database
- 16.3 Creating webpages with Python files & CGI

- 16.4 Web scrapping with urllib and BeautifulSoup
- 16.5 Project 3: Web scrapping automation

### **Chapter 17: Socket programming**

- 17.1 Introduction to sockets
- 17.2 Understanding the client-server architecture
- 17.4 Implementation of multithreading with sockets
- 17.4 Advanced GUI
- 17.5 Project 4: Chat application

### **Chapter 18: Email sending Automation**

- 18.1 Understanding SMTP
- 18.2 Sending email with sendmail() function
- 18.3 Sending email using Gmail
- 18.4 Email sending with attachment and MIME
- 18.5 Project 5: Mass emailer

### **Chapter 19: Bonus class: Further learning & Revision**

- 19.1 Introduction to Testing automation and Selenium
- 19.2 Introduction to Data analytics and matplotlib
- 19.3 Introduction to Networking Automation and DevOps
- 19.4 Introduction to Django framework
- 19.5 Revision

### **Chapter 20: Test and Certification**
